P22 GD+T fonts (Geometric Dimensioning & Tolerancing Symbols)

Copyright © 1997-2001 P22 type foundry. All rights reserved

This font set will allow you to include Geometric symbols in documentation.

If you ever wanted to create professional documentation, this is for you. Imagine being able to create things like $\phi 0.14 \text{ A C M}$ or $\perp \phi 0.08 \text{ A}$ or $-A-$ to properly write documentation or create other working documents. The package consists of TrueType™ and PostScript® versions on a 3.5" disk

so that these can be used with all major software. These fonts comply with **ASME Y14.5M-1994**

Consists of over 100 standard symbols and characters plus many additional special features to create complex symbols such as: $\text{A} \leftarrow$ $\swarrow \phi$

Requirements:

Windows 3.x or higher and an application that can use TrueType™ or PostScript® fonts
(includes most major software programs)

WordPerfect 5.1 (DOS) can use TrueType™ fonts

Other: consult your documentation

licensing information on request

Order Part Number **P22GD**

Just \$ ~~39.95~~ **19.95** + \$ 5.00 shipping & handling
plus any applicable state and local taxes
